

**ATLANTIC FEDERATION FOR TECHNICAL EDUCATION & RESEARCH**  
**International Conference on Urban Studies, City Design and Planning (ICUSCDP-24)**  
09<sup>th</sup> - 10<sup>th</sup> Jan 2024 Dubai, UAE  
Report submitted after attending the Conference

The Atlantic Federation for Technical Education & Research (AFTER) has conducted an International Conference on Urban Studies, City Design and Planning (ICUSCDP-24) on 09<sup>th</sup> and 10<sup>th</sup> Jan 2024 which was held in Dubai, UAE.

The ICUSCDP-24 conference aims to gather leading experts in the field of urban studies, city design, landscape design and planning. This event serves as a vital platform for a diverse international community comprising researchers, urban planners, landscape architects, designers, and policymakers.

**Dr.M.Banu Chitra** have presented a paper titled “**Soundwalk as a Method to Uncover the Interplay between Landscape and Soundscape**” on **Jan 9<sup>th</sup> 2024**. Bridging the gap between landscape and soundscape studies this paper evaluates a selected urban park in Vijayawada, India, exploring landscape elements' impact on sound perception using the ISO/TS 12913-2:2018 soundwalk method B, the study involves landscape students conducting sound walks.

*Certificate received for the presentation of the paper*

The conference featured inspiring keynote speeches by renowned experts covering diverse topics such as the Management of surface water resources in the N'fis Basin in the High Atlas, the impact of strategic leadership and its role in achieving sustainable development within economic institutions in the Kingdom of Saudi Arabia, Resistance to change in the management contract in the Western Cluster of the National Water Company, the impact of the psychological contract of the individual on the sustainability of the governmental organization in the Kingdom of Saudi Arabia, e-Governance and effective management of COVID-19 in Saudi Arabia (in Retail Private Sector: An Employee's Perspective), Indicators Affecting the Operation of Public Transport in Regions and Their Interfaces, European policy developments and merger control by Giuseppina Gianfreda and Luisa Scorciarini Coppola, Computational Methods for Partial Differential Equations Arising from Biological Models Based on Finite Difference Approach, A

Venue for Women's Engagement in Environmental Interreligious Peace building. Additionally, the conference explored the topic of Indigenous agricultural revolution for sustainable development, with a case study on the Gnostic Agritech ecosystem etc.

I wish to thank the institution for the support

Dr.M.Banu Chitra
